pumpkin FAVOR BOXES

Create Your Own Paper Pumpkins

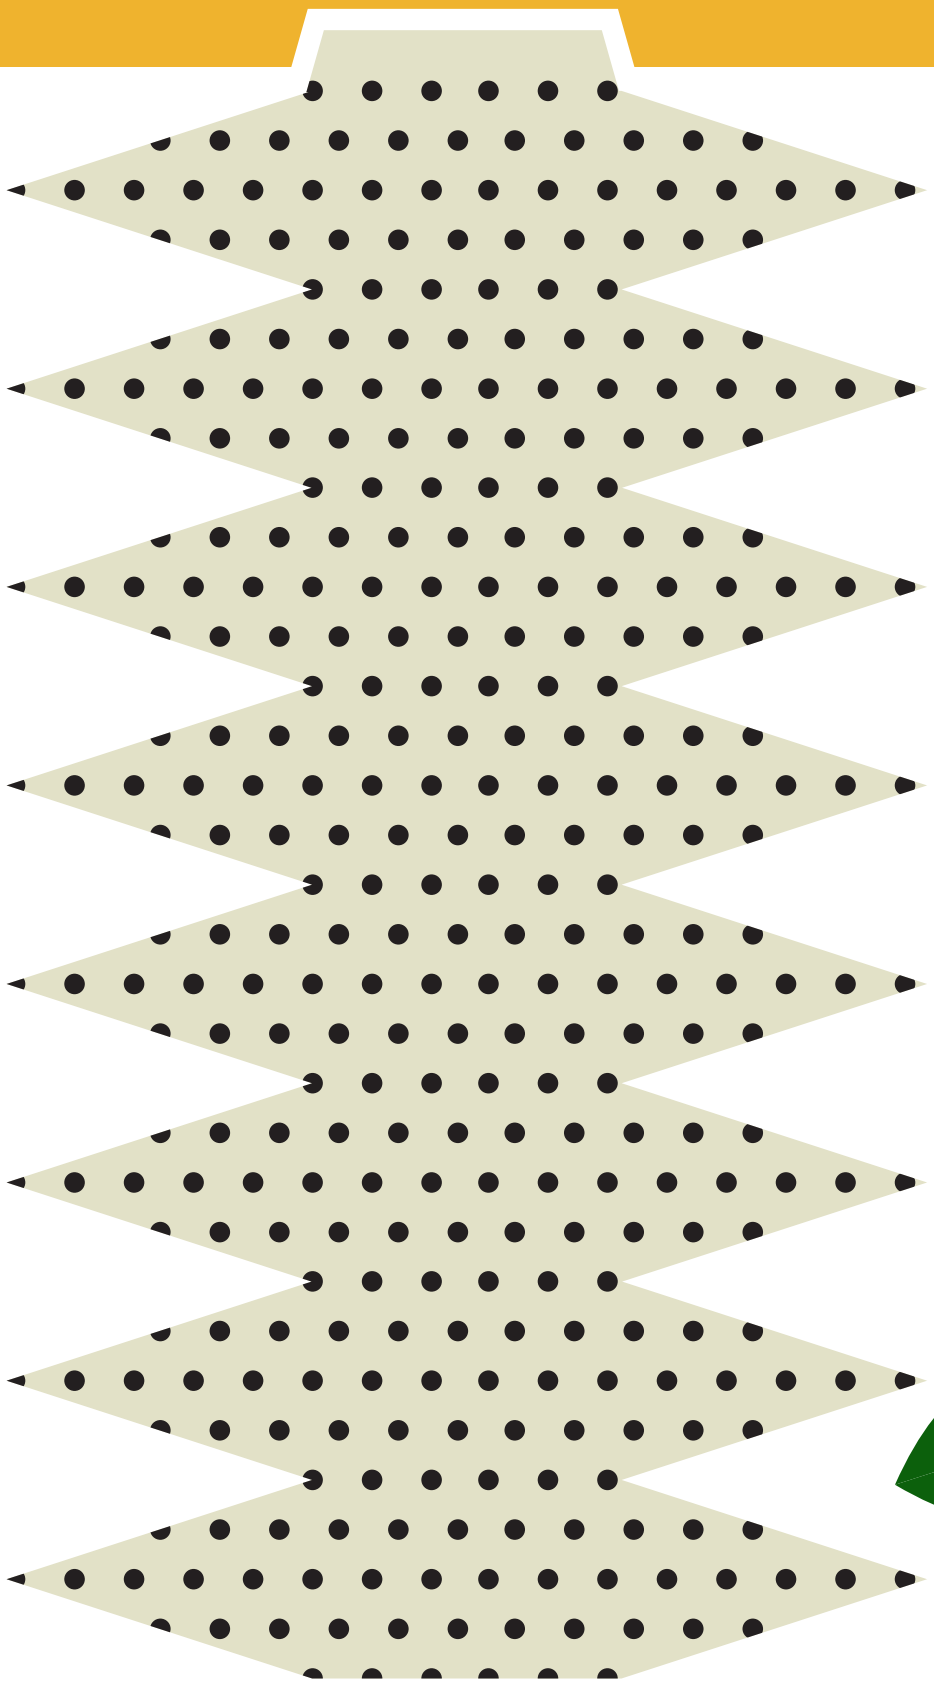

1. Print out this template and cut out the pumpkin shape and leaf.
2. Fold the pumpkin along the dotted lines where the triangles meet. Also fold the triangles up on one side to create a base for the pumpkin to sit flat.
3. After laying the folds flat again, tape the flap to the other edge of the pumpkin, creating a circular shape.
4. Use a small hole punch or a needle to poke holes in the tips of the triangles.
5. Tie a knot with your cord or ribbon (I used a natural looking cord here). String the knot on the outside of one of the bottom triangles. Continue threading your cord through the bottom set of triangles.
6. Pull the string up inside the pumpkin. At this time place your favors inside the box.
7. Use the thread to connect the top triangles and pull into a circle.
8. Punch a hole in the top leaf portion and thread that through the cord to sit on top of the pumpkin. Tie a knot and cut off the excess cord.

NOTE: Tape or brads may be used in place of cord/ribbon for a similar effect.
